WHY IS AIR TRANSPORTATION CONVENIENT?

SPEED

Express delivery is guaranteed on every selected route.

SAFETY

According to statistics, air transportation is highly secure.

COVERAGE

Flights organized to international and national airports.

FAST CLEARANCE

Simplified checkout procedure at the airports of departure and arrival.

VERSATILITY

Modern cargo planes deliver goods of any weight and size.

MONITORING

Cargo location tracking is available online 24/7.

WHAT ARE THE KEY FEATURES OF MARITIME TRANSPORT?

EFFICIENCY

Economical long-distance international transport.

COVERAGE

Massive international and intercontinental transportation.

RELIABILITY

Loading and unloading of goods at the port is under strict supervision.

EFFICIENCY

Facilitated process of loading and unloading goods in standardized containers.

VERSATILITY

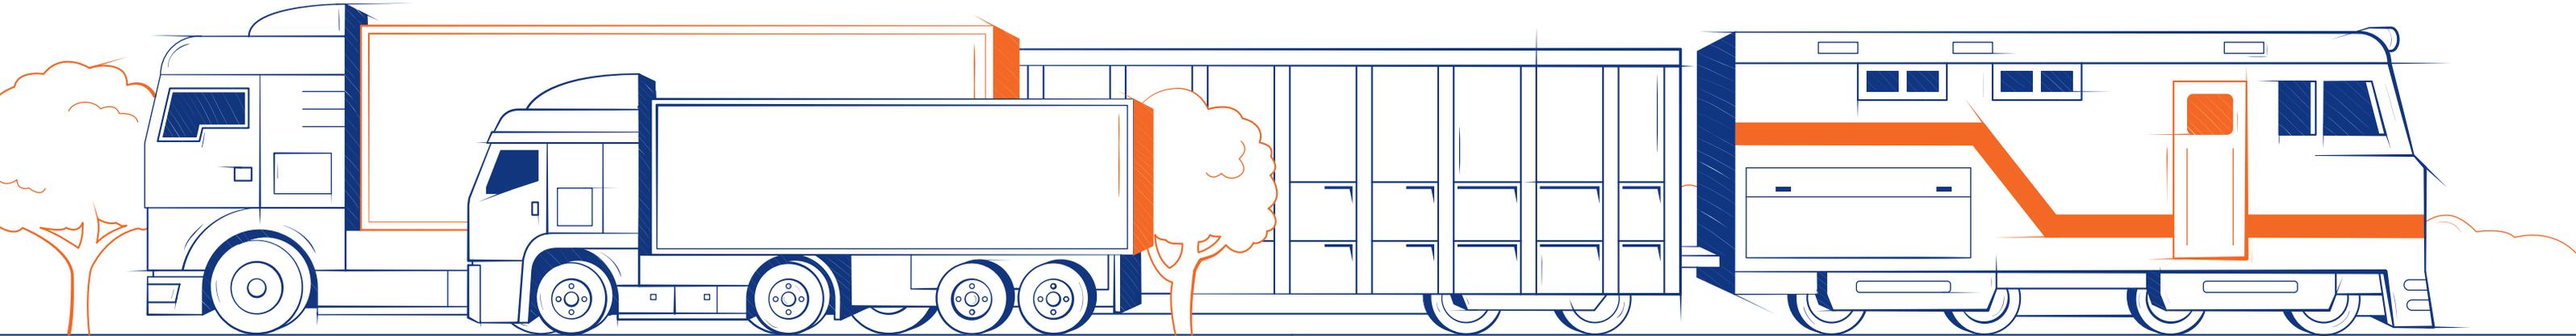

Transportation of goods of every type, including bulky and bulk cargo.

PREDICTABILITY

Departures and arrivals of ships take place according to a regular schedule.

WHAT ARE THE ADVANTAGES OF ROAD TRANSPORT?

WHAT IS PRACTICAL ABOUT RAILWAY DELIVERY?

FROM DOOR TO DOOR

Organization of transport from the place of loading to the final point of unloading.

AVAILABILITY

Loading and unloading 24 hours a day, 7 days a week.

EFFICIENCY

Express delivery of goods in case of urgent requests.

COST CONTROL

The longer the distance, the lower the cost of transportation per unit of production.

LOAD CAPACITY

Delivery in one shipment regardless of the volume of products.

CAPACITY

All kinds of transportation schemes for heavy and oversized products.

OPTIMAL

Delivery of any volume of any type of cargo, including thermal, hazardous and oversized.

TRACKING

Advance notification of delivery time and real-time location monitoring.

MOBILITY

Route adjustments in case of unforeseen situations.

PREDICTABILITY

Accurate planning of cargo delivery time regardless of the weather and season.

SAFETY

Reliability of railway transportation and safety of goods in sealed freight wagons.

GREEN

Electric trains do not emit harmful gases.

CUSTOMS SERVICES

At AsstrA customs agencies clients receive comprehensive customs services including preparation of all necessary documentation.

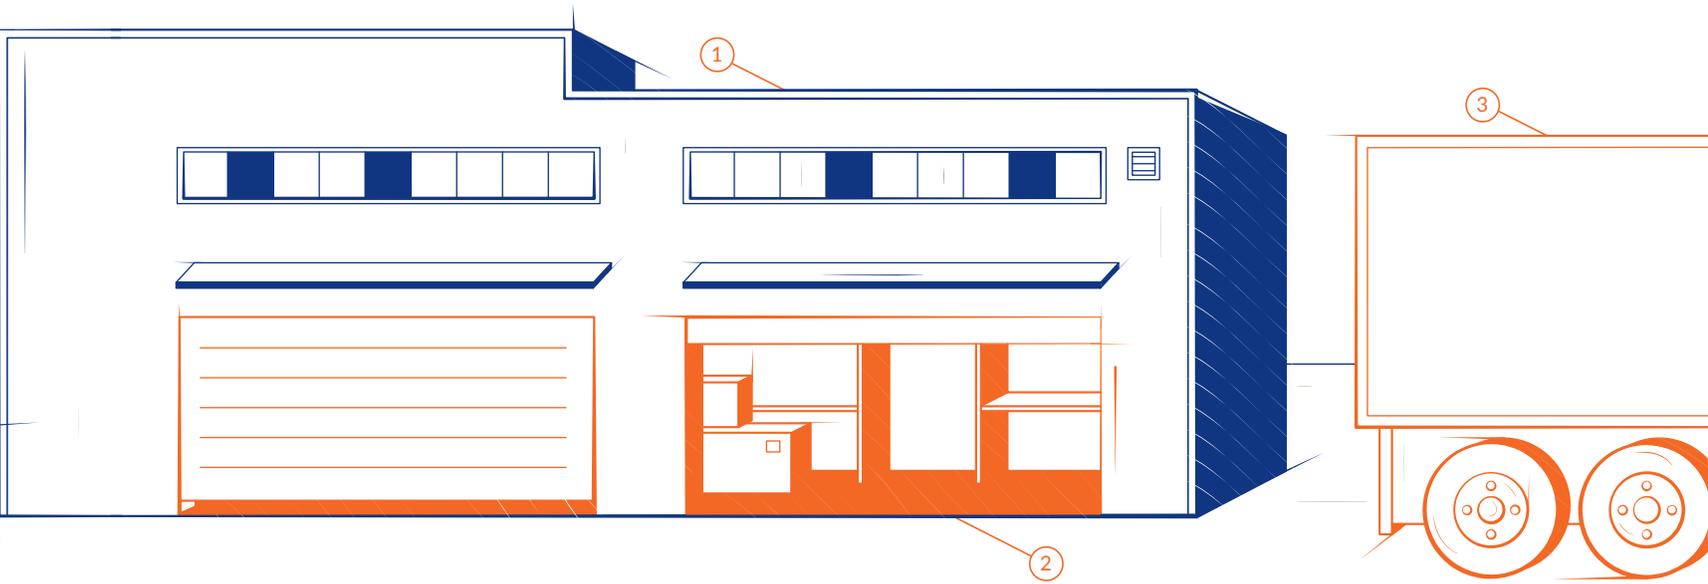

- 1. Customs applications issued by the company's agencies are served first.
- 2. Declarations for the import, export and transit of goods are processed using a simplified system.
- 3. Cargoes under AsstrA's care go through a minimum number of inspections.

WAREHOUSE SERVICES

One-stop savings on warehouse and logistics services from the same provider.

Comprehensive solutions for organizing end-to-end supply chains, all available in one place.

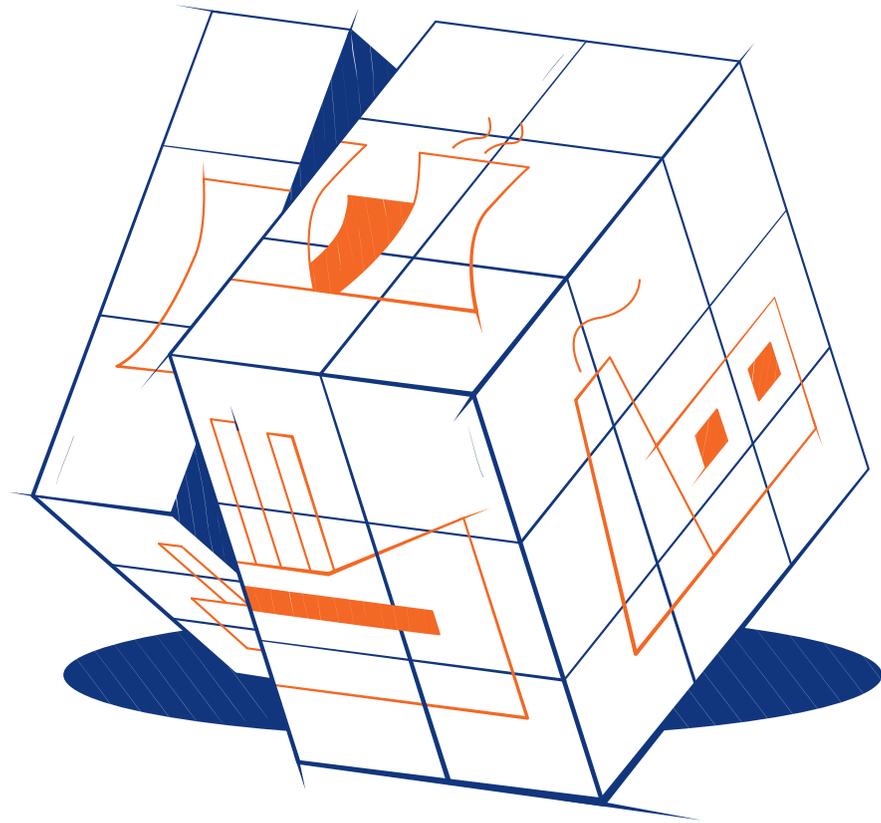

- 1. Consolidation and assembly, cross-docking, and distribution to final recipients.
- 2. Pre-sale preparation: labeling, packaging in primary containers, packaging under the client's brand.
- 3. Crane loading of oversized and heavy cargo.

PROJECT LOGISTICS

Comprehensive services tailored to each project's needs.

Provided services include planning, budget and time management, delivery by each mode of transport, logistics engineering, solution management and workflow.

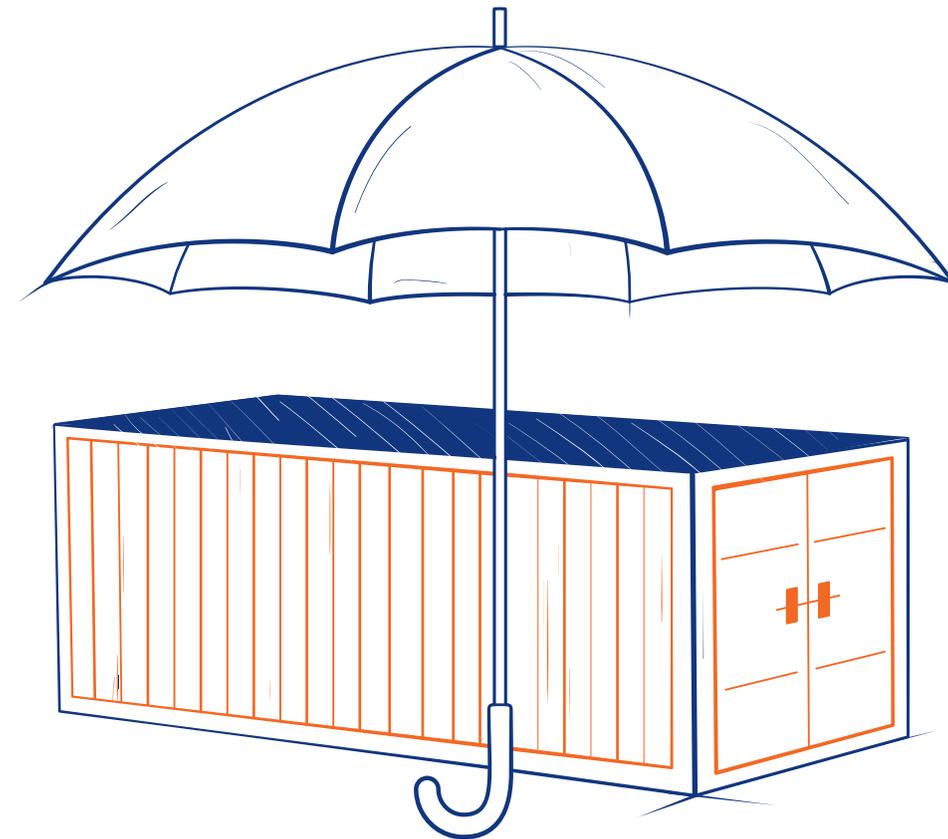

Project logistics and the management of industrial projects is based on a clear time frame and consistency.

Thanks to project transportation, it becomes possible to build airports, factories, reactors and other industrial enterprises.

CARGO INSURANCE

For peace of mind about cargo safety at every stage of transportation.

Covers damages and losses of partial or entire shipments resulting from accidents or illegal third-party actions.

Liability is covered for up to EUR 3,000,000 for each insured event.

Insurance coverage is provided by Zurich Insurance Company Ltd (Switzerland).

DDP DELIVERY

Organization of supply chain management, supplier search, and trading scheme selection, with use of asstra infrastructure possible.

Clients may also take advantage of consulting on a wide range of issues related to contract logistics and foreign trade outsourcing.

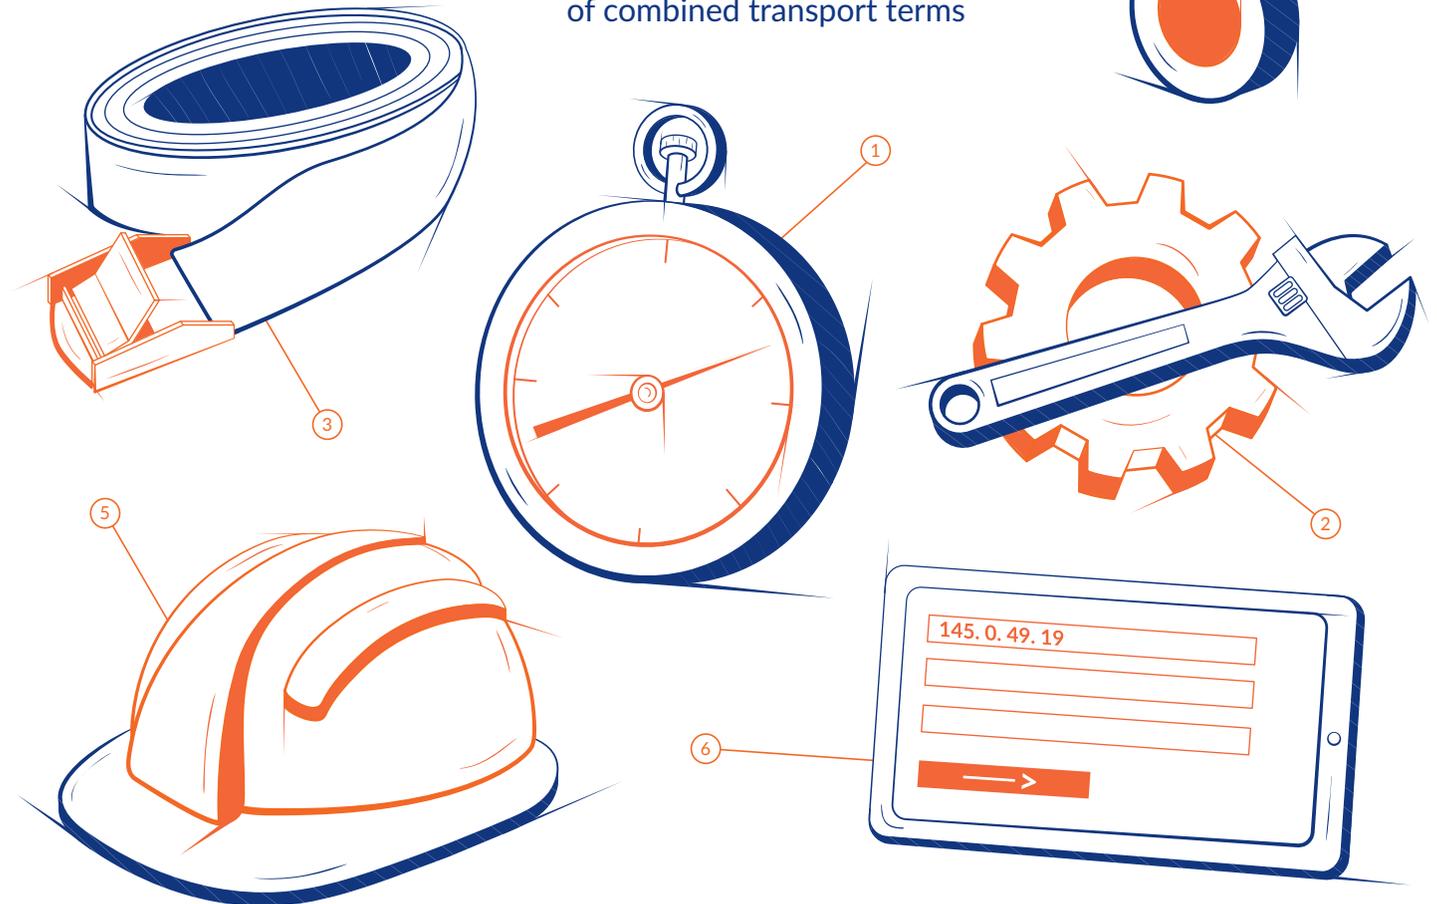

Risk analysis, complete and correct execution of the necessary documentation, tracking the progress of the project and each individual unloading.

Coordination with an Asstra project manager results in a well-built supply chain with a clear schedule and accelerated customs clearance.

Import and export according to your contract, including consolidation, warehousing and distribution based on your needs.
